Where do 14 million Americans go to save?

Americans save in lots of places. But a definite and very important trend is now taking place: Every day, more and more people are opening savings accounts in insured Savings and Loan Associations.

In fact, Americans are now putting more of their savings account dollars in these Associations than anywhere else!

There are several very simple reasons why this is so:

ONE—Your savings earn excellent returns. You make money because the Associations invest most of their funds in sound, steady-paying home mortgages.

TWO—You enjoy complete safety. Your savings are protected by good management and substantial reserves. They are insured up to \$10,000 by the Federal Savings and Loan Insurance Corporation—an agency of the U. S. Government.

THREE—These Associations are local organizations, managed by responsible, experienced people of your own community. They give friendly, prompt and convenient service.

And here's another way insured Savings and Loan Associations can be a big help to you: When you're thinking of buying a home, remember that they make liberal mortgage loans. What's more, they see to it that you get your money quickly and at moderate rates.

It's a good idea to get to know your nearby insured Savings and Loan Association. You'll find it an important place—and a mighty good place to do business.
